- A unique design built & designed specifically for your website.
- An integrated WordPress dashboard to manage your website.
- Creating a dynamic website based on PHP and MySQL databases.
- The site is powered by HTML5, JS and CSS3.

Framework & Project stages:

Timetable for the project:

We know that you are excited to get your final product (your website), and we certainly don't want you to wait for long periods before your website design is finished. Therefore, we promise that we will work on the agreed date and will continue to work until you are completely satisfied with the result.

The stages of our project will be divided into two phases: 1. Designing an initial concept with multiple proofs until we agree on the front end design. 2. Programming and developing the agreed design in the form of pages for a fully functional website.

The total process may take up to 14 days to develop your website. We will keep you updated on the progress we are making on programming and developing your website. We will share our work with you and will always be available to answer any questions you may have during the development and design of the website.

Amendments & Final Review:

You must provide a list of all required updates and changes for each revision. We offer you unlimited revisions until you are completely satisfied with the results of your website. Be careful to mention any required modifications or changes in order to get the best result.

You will need to provide clear instructions for each revision as to what modifications, changes or updates you want us to make. Most importantly, you will need to provide a list of required changes either in writing, spoken, video or videotaped.

Completion & post-delivery services:

Approval of the final version of your website design means that your site is ready for delivery. Once it is delivered, our task is over and the site is yours, and accordingly you have to complete the second and final financial payment after handing over the site.

We will be available [for a period of 60 days] after the delivery of the site to provide you with full technical support regarding the website and how to deal with the control panel, we will also be available throughout this period to correct any errors or potential deficiencies.

After the [60-day free support] period ends, you can take advantage of our technical support packages if you need any future assistance at any time at a very reasonable cost. Our maintenance service will give you peace of mind when it comes to site changes, adding data, optimizing for search engines or code updates.

Intellectual Property:

After completing the programming and design of your website, you will own it completely, including the software used, the original codes, and the website files. We will deliver working files in full, and you will be responsible for saving or reusing them at your own risk.

You also guarantee that you have the legal right to all the elements used on the site, including texts, images, and anything else that you provide to us or request to be added to the site.

You also guarantee that you will not hold us responsible for any claims or compensation resulting from the content of the site from third parties, as our mission ends Design and delivery of the site.
